

HostMax™

GPU Clusters. Built. Hosted. Ready to Run.

What is HostMax

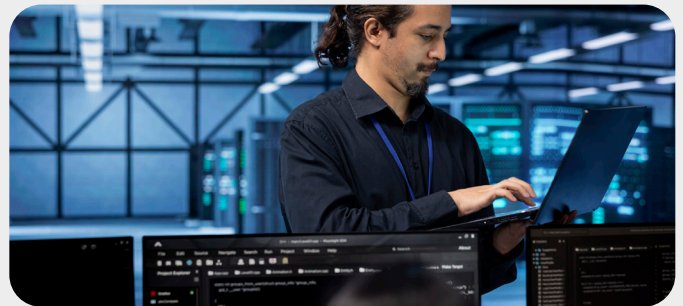

AI-ready hosting from AMAX's hosting center

- Turnkey hosting for your AI solution immediately after build
- Supports both air and liquid cooling, rack designs up to 132 kW
- On-site engineers available for configuration updates or service requests

Seamless Transition to Colocation

Short-term hosting to bridge colocation timelines

- Begin operations while colocation space is finalized
- Avoid delays with same-rack staging for faster hardware transfer
- Keep your project on track without third-party dependencies

Test and Validate with On-Site Engineering Services

Optimize performance before final deployment

- Run QA, prototyping, or performance testing
- Use your own software stack and tools
- Remote access with full system visibility
- Engineers available to optimize for your specific workload

Scale with Confidence

Start operations and grow as needed

- Launch with what you need today, expand when ready
- AMAX engineers design and support scalable cluster architectures
- Partner with AMAX for staged rollouts, pilots, and long term growth
