

OEM Solutions

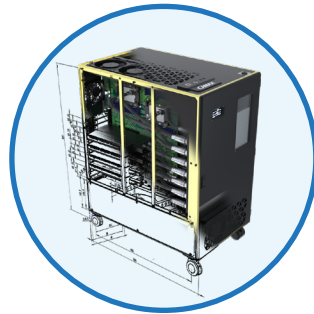

AMAX designs and builds computing solutions for specialized applications in industries such as security, medical, semiconductor, CSPs and more. Whether you're launching a full rack, packaging your own appliance, or prototyping a new edge or embedded device, AMAX delivers your concept as a production-ready solution.

What We Provide

Solution Design & Planning

- Architecture guidance for thermal, power, and mechanical requirements
- Support for GPU systems, industrial, and edge devices
- Collaboration across design, validation, and testing

Standard or Custom Builds

- Air or liquid cooling, tower or rackmount options
- Integration of custom accelerators and I/O
- Custom branding for packaging, manuals, bezels, and BIOS

Supply Chain Management

- Coordination with supply chain teams for sourcing and availability
- Packaging and logistics for global delivery
- Lifecycle planning to ensure consistent availability

Quality Assurance & Turnkey Service

- Hardware testing, burn-in, and deployment services
- Warranty coverage and post-deployment support
- Refurbished systems restored to like-new condition

Precision-engineered solutions, delivered globally at scale
